Subject:	Cyber security / NSO

Dear Ehud

Hope all is well with you. Did you follow the aluminium spreads? My predictions were pretty accurate !

I had a long conversation yesterday with the guys at NSO (the cyber security company) in regards to their new venture (the defense system) as we discussed in Zurich. I will invest in this new venture myself and probably be on the board.
As for Meier Dagan, he really wants to be involved in the company. However, he prefers to only act as a board member or consultant if they find a more suitable person for the role of the chairman. I assume this is for health reasons.

After hearing about this development, I have mentioned your name to the founder. He will keep this strictly confidential of course.

I would therefore like to meet with you at your convenience and introduce you to the founder and CEO of this new venture. I know that you are a very busy man and I would never waste your time unless I really believe that something interesting for all parties could come out of this.

Please also find a link to a recent FT article on NSO.

Please let me know what you think.
thanks and best regards
Gary
